OBJECTIVE

A focused and achievement-driven individual aims to promote a dynamic organization using a strong work ethic and a love of excellence. By focusing on collaboration and ongoing growth, I am dedicated to the success of organizational goals while at the same time further developing my own expertise within a challenging and dynamic environment.

EDUCATION

Maulana Abul Kalam Azad University of Technology <i>Master of Computer Applications</i>	June 2025 <i>CGPA: 8.23/10</i>
University of North Bengal <i>Bachelor of Computer Applications</i>	July 2023 <i>CGPA: 9.07/10</i>

COURSEWORK

Courses: Object-Oriented Programming, Data Structures & Algorithms, Data Science, Computer Networks, Operating System, Database Management System

SKILLS

Languages: Java, JavaScript, HTML5/CSS3, Tailwind, React, Node.js, Express

Tools: Git/GitHub, VS Code

PROJECTS

Aurality: Music streaming Web <i>HTML5, CSS3, JavaScript, Tailwind, React.js</i> (GitHub)(Live Demo)	Sept 2024
- Developed a modern music streaming application using React.js, HTML, CSS, and JavaScript, enhancing user experience with a sleek and intuitive interface. - Implemented features for music discovery, playlist creation, and seamless playback, integrating APIs for real-time music data. - Utilized Redux for state management and handled API interactions, ensuring efficient data handling and a seamless user experience. - Optimized application performance and responsiveness, resulting in a 20% increase in user engagement and satisfaction.	
Gemini AI Chatbot Clone <i>HTML5, CSS3, Tailwind, JavaScript, React.js</i> (GitHub)(Live Demo)	Sept 2024
- Developed a sophisticated clone of an AI chatbot using React.js and the Gemini API to enable advanced natural language processing capabilities. - Designed and implemented a conversational interface that simulates real-time responses and user interactions, closely mirroring the functionality of the original chatbot. - Ensured a highly responsive and intuitive user interface, enhancing the user experience by providing seamless conversational flows and quick response times. - Integrated various APIs to replicate the original chatbot's features, including context-aware responses and dynamic conversation handling. - Utilized CSS and modern styling techniques to create a visually appealing and user-friendly interface, ensuring consistency with the original design.
